BIORESONANCE ACCORDING TO PAUL SCHMIDT

THE EASY WAY TO GET STARTED WITH
RAYOCOMP PS 10 LIGHT

Please note: Irrespective of the breadth of information, advice and problem-solving approaches provided hereby and resulting from 40 years of experience, it cannot replace the visit to a practitioner of alternative medicine or a physician with an interest in naturopathy. Further, please note that traditional orthodox medicine does not accept or even recognise the effects of bioenergetic oscillations.
Furthermore, we indicate that traditional orthodox medicine does not accept or even recognize the effects of bioenergetic oscillations even with existing clinical prospective, double-blind randomized, placebo controlled study.

A POSITIVE RESONANCE FOR HEALTH

Discover the successful concept of alternative medicine. For over 40 years, Rayonex Biomedical GmbH has represented the cause-oriented treatment approach of Bioresonance according to Paul Schmidt. A therapy that is valued in over 45 countries around the world.

BIORESONANCE ACCORDING TO PAUL SCHMIDT

The unique combination of German engineering and an understanding of alternative health care is what makes our medical devices so special. The treatment is based on one of nature‘s principle: Sunlight is the most well-known form of bioresonance. When sunlight comes in contact with our skin, our skin darkens. This is caused by the UV component of sunlight, which has a frequency spectrum in the high terahertz range.

In short, Bioresonance according to Paul Schmidt is based on stimulating the organism with the aim of supporting self-regulation. Since then, Rayonex Biomedical has actively been researching other frequency spectra that can be transmitted to patients during treatment with modern bioresonance devices.

RAYONEX COMPACT PROGRAMS

In addition to offering individual therapies, Bioresonance according to Paul Schmidt also offers sophisticated compact programs. These have proven to be very effective, particularly when it comes to treating cervical spine problems, as our new study shows. The programs are extremely easy to use: simply switch on the Rayocomp PS 10, run the compact program and the therapy can start.

RAYOCOMP PS 10 LIGHT

- ✓ Portable device for ambulant use
- ✓ Treatment at home
- ✓ Variety of treatment programs
- ✓ Extremely easy to use
- ✓ Flexible, risk-free purchasing options
- ✓ For human and veterinary field

MODULE FOR RAYOCOMP PS 10

M8: RAH-COMPACT PROGRAMMES

For all those who are not yet familiar with Bioresonance according to Paul Schmidt, module M8 is the perfect introduction. In combination with a Rayocomp PS 10, it becomes very easy to use so-called Compact programs, which are compilations of RAH programs that have been tried and tested worldwide over decades. Since Bioresonance according to Paul Schmidt is used extremely successfully in both human and veterinary medicine in over 45 countries around the world, the M8 module contains the most important Compact programs from both fields. This way, beginners can not only use Bioresonance according to Paul Schmidt on themselves, but also on their animals. A total of 63 Compact programs are available for human medicine and for veterinary medicine (horse, dog and cat) there are a total of 103 Compact programs.

The application is extremely simple. After you have switched on the Rayocomp PS 10 and plugged in the detector, select the Compact program you want with the IF1 key confirm with OK button and press Start! Then lie down or place the animal on the surface detector and let yourself be harmonised for the duration of the Compact program.

The M8 module thus provides a total of 166 frequently used Compact programs from the human and veterinary fields. If, like many users worldwide, you then want to go deeper into bioresonance according to Paul Schmidt, you can upgrade to the M9 (harmonisation of all RAH Human programs), the M10 (testing and harmonisation of all RAH Human programs) or the M11 (testing and harmonisation of all RAH Veterinary programs), depending on the desired application. The costs you have already paid for the M8 will be taken into account for the upgrades.

If you already own a Rayocomp PS 10 and have so far “only” been working with the fundamental frequency values, the M8 module is also the perfect introduction to the professional world of the RAH (Rayonex Analysis and Harmonisation System).

The M8 module is available for the Rayocomp PS 10 from program version 65. Each Rayocomp PS 10 can be updated to the new program version 65 free of charge.

MODULE UPGRADE

FOR THE RAYOCOMP PS 10

The M8 module thus provides a total of 166 frequently used Compact programs from the human and veterinary fields. If, like many users worldwide, you then want to go deeper into Bioresonance according to Paul Schmidt, you can upgrade to the M9 (harmonisation of all RAH Human programs), the M10 (testing and harmonisation of all RAH Human programs) or the M11 (testing and harmonisation of all RAH Veterinary programs), depending on the desired application.

With the module upgrade from M8 to M9, all human RAH programmes can be used for therapy. With the module upgrade from M8 to M10, all RAH programmes of the human range can be used for testing as well as for therapy.

The M10 module is the TOP module in the Rayocomp PS 10 for the human range.

With a module upgrade from M8 to M11, you can extend the scope of your Rayocomp PS 10 to all RAH programs of the veterinary field. Module 11 provides all available RAH programs for testing and harmonisation for horses, dogs and cats.

Module M11 is the TOP module in the Rayocomp PS 10 for the veterinary field.
